## Flight is for you if...

**You want to use software to grow your business.**

But choosing the right option is confusing and stressful.

**You don't want to sink time and money into the wrong solution.**

And end up with a generic, one-size fits no-one platform.

**You're already using a CRM to track some processes.**

But have to muddle it together with other tools to build a make-do solution

And even if you've found a solution that might do everything.

**You need a responsive customer service team who'll make it work for you.**

# The truth is...

You'll never find "off-the-shelf" or enterprise software to solve your workflow problems without investing hundreds of hours and vast sums of money.

## Why?

Because they aren't built with your training and events business in mind.

You're too small for an enterprise solution.  
Too big for Microsoft Excel.

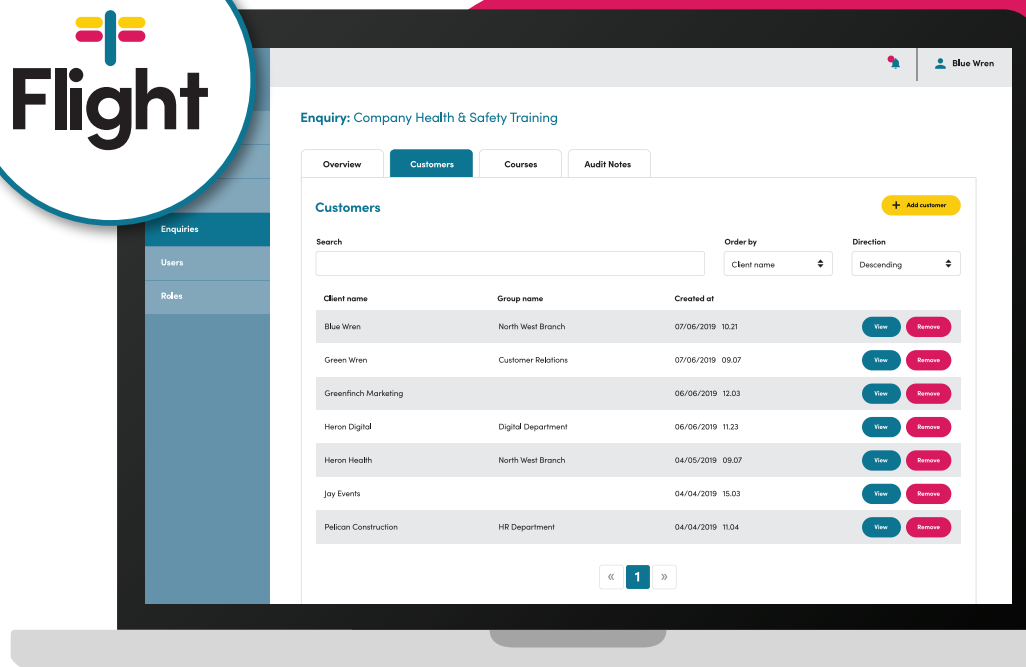

# ...it's time to think again.
